

YOU STAY AHEAD

AlgiScan[®]

Pro-active and Individualised Analgesia

Anticipate your patients' analgesic needs

idmed
an eye on your patient

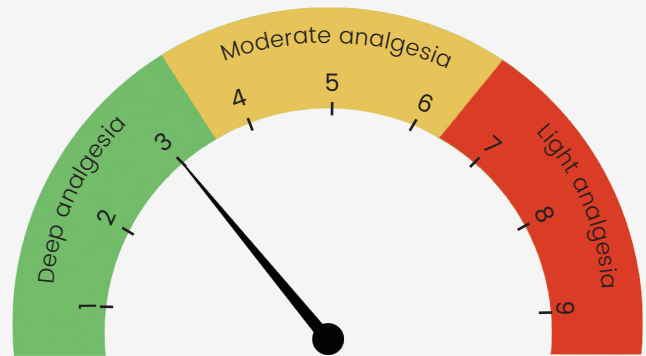

+ Individualised diagnostic tool

- Evaluate the sensitivity threshold to nociception
- Optimisation of opioid titration
- Based on the actual patient needs

+ Predictive decision support

- Determine the appropriate level of analgesia
- Anticipate the response to intraoperative stimuli
- Predict the nociception / anti-nociception balance

PPI Index Interpretation

+ PPI Index to measure analgesia

- Clear and intuitive
- Instantaneous and accurate measurements
- Widely published and documented technique

+ Designed for the OR, PACU and ICU

- Lightweight and portable
- Easy to use
- Reusable eyecup

Control analgesia for the comfort of your patients
